SUMMARY

I'm a passionate Full-Stack Developer with 4 years of experience in building secure, scalable, and high traffic web applications using PHP, Laravel, Vue.js, and Inertia.js. I've worked with startups and tech firms to develop SaaS tools, CMS platforms, eCommerce systems, and AI-based apps always focusing on performance, usability, and clean architecture. I've also led development teams and helped junior developers grow, and driven big projects that truly impacted businesses.

WORK EXPERIENCE

Enzipe - Full Stack Developer   Oct 2023 – Present

At Enzipe, I worked as a team lead and full-stack developer on large scale platforms with over 1M users.

- **Summarizer.org** – Scaled the platform to 1M+ users. Built and optimized 30+ tools, APIs, and mobile integrations.
- **Paraphrasing.io** – Delivered an AI-powered content platform with free & premium models.
- **Imagetotext.io** – SEO-optimized tool site with advanced features like image/PDF converters.
- **Minifier.org** –Built a lightweight utility tool for minifying CSS, JS, and HTML. Optimized for fast response and high-volume usage with clean UI and efficient processing.
- **POS System** – Developed a Point of Sale system for inventory, billing, and analytics. Designed for small-to-mid businesses with real-time dashboard stats, product management, and multi-user roles
- Managed junior developers and guided them with best coding practices and architecture.

TechTrack - Senior Laravel Developer   Jan 2023 – Oct 2023

Led the core development of two major platforms:

- **Matgarli (SaaS Platform)** – Designed order/product management, payment integrations, admin controls, etc.
- **Taam-AI** – Built AI tools for text generation, image recognition & multilingual chatbot features.
- Mentored junior developers and helped speed up project delivery by ~30%

Sunztech Intl — Laravel Developer   Sep 2021 – Jan 2023

- **RS Taxi** – Built a custom Taxi Booking System with admin/rider dashboards, invoicing, ride logic.
- **AI Chatbot Sytem** – Created an AI-Model app using React + Laravel with real-time ChatGPT-like interaction
- Enhanced UI/UX and implemented secure login systems.

SOLO & PERSONAL PROJECTS

Naz Fabrics (E-commerce)

Developed a full featured e-commerce site using Laravel. Implemented separate dashboards for admin and users, complete product lifecycle management (add/edit/delete), order placement, and integrated payment methods. Enabled features like product reviews, dynamic blogs, and a rating system. Connected the store with courier APIs for real-time delivery tracking, and built a user-friendly shopping interface optimized for mobile and desktop.

Property PK (Real Estate Platform)

Built a real estate web application using Laravel with a custom CMS panel for easy property listing management. Users can search for properties using multiple filters, view detailed listings, and contact agents directly through the platform. The admin panel allows full control over listings, agents, locations, and SEO settings. Focused on performance and easy navigation to give users a smooth experience on both desktop and mobile.

Student Management System (Laravel + Inertia + Vue.js)

A small-scale Inertia SPA app where users can register/login, add simple posts with image/description, and manage them. Admins can view and suspend users. Emphasized SPA routing, validations, and permissions handling.

OOP MVC CMS (Custom PHP)

Lightweight CMS made with core PHP and MVC pattern. Included basic blog creation, routing, and templating , ideal for learning custom architecture and OOP fundamentals.

EDUCATION & CERTIFICATIONS

BS Computer Science
 Virtual University

PHP Developer Certification
Corvit Software House

Internships
Realstors (PHP Backend), Corvit (Frontend/UI focus)

TECHNICAL SKILLS

- **Languages & Frameworks:** PHP, Laravel, Vue.js, Inertia.js, JavaScript, HTML/CSS
- **Database:** MySQL, MariaDB
- **Other Tools:** Git, REST APIs, MVC architecture, Css
- **Roles:** Full-Stack Developer, Team Lead, API Developer, CMS Builder
- **Soft Skills:** Leadership, Problem-solving, Clear Documentation, Mentoring Juniors
