

SHAHZAMAN

Full Stack Web Developer

Laravel, PHP, Vue.js, Rust Microservices

shahzaman.dev • @shahzamandev • sheikhshahzaman001@gmail.com

SUMMARY

Full Stack Web Developer with 4+ years of experience building production web applications across healthcare, AI tools, SaaS platforms, and business systems. Experienced in designing backend APIs, scalable architectures, and real-world systems used daily by clinics and high-traffic platforms. Currently working on healthcare software for rehabilitation clinics in Japan.

WORK EXPERIENCE

JSYS Technologies — Software Engineer

Aug 2024 – Present

Working on RehabSuite, a multi-tenant healthcare management platform used by rehabilitation clinics across Japan.

- Developed core backend systems in **Rehab-Suite** for patient records, appointments, facilities, billing, and admin workflows using Laravel and PHP
- Built and maintained secure authentication and OTP systems supporting email and phone identifiers
- Contributed to microservices architecture using Laravel and Rust, with Kafka-based event-driven communication
- Designed and consumed REST APIs for web dashboards and mobile applications
- Implemented multi-tenant architecture ensuring strict data isolation between clinics
- Improved performance using Redis caching, background jobs, and database optimization
- Worked in production healthcare environments using Docker, PostgreSQL, and distributed services

Enzipe — Senior Full Stack Developer

Oct 2023 – Aug 2024

Worked on AI-powered platforms and business tools serving over one million monthly users.

- Developed and maintained **Summarizer.org** with 30+ AI-powered text processing tools
- Built **Imagetotext.io**, an OCR web application for image and PDF text extraction
- Worked on **minifier.org** and content optimization tools for high-traffic platforms
- Built a **Point of Sale** (POS) system with inventory management and billing
- Designed backend architecture, optimized database queries, and implemented caching
- Integrated subscription payments using Stripe and PayPal
- Mentored junior developers through code reviews and technical guidance

TechTrack — Senior Laravel Developer

Jan 2023 – Oct 2023

Built SaaS platforms and AI-integrated web applications from scratch to production.

- Designed and built **Matgarli**, a multi-tenant SaaS platform for order and product management
- Implemented role-based access control and payment integrations
- Led backend development for **Taam AI**, combining text generation, image analysis, and multilingual chatbot features
- Built real-time features using WebSockets
- Designed clean REST APIs and mentored junior developers

Worked on booking platforms and service marketplaces.

- Built **RsTaxi**, a complete taxi booking platform with rider, driver, and admin dashboards
- Implemented real-time driver tracking using Google Maps API
- Developed booking workflows, fare calculation, and automated invoicing
- Worked with AJAX-based live updates and role-based access control

KEY PROJECTS

- **Summarizer.org** — AI-powered content platform with 30 plus text tools built using Laravel and Vue.js, serving over one million monthly users.
 - **RehabSuite Healthcare Platform** — Multi-tenant healthcare SaaS for rehabilitation clinics in Japan, built with Laravel and Rust microservices using Kafka for event-driven communication.
 - **Imagetotext.io** — High-traffic OCR web application for extracting text from images and PDFs, optimized for scale using background jobs and Redis caching.
 - **Taam AI Platform** — AI platform combining text generation, image analysis, and a multilingual chatbot with real-time WebSocket communication.
 - **Matgarli SaaS** — Multi-tenant order and inventory management system with role-based access control, payments, and automated invoicing.
 - **RsTaxi** — Taxi booking platform with real-time driver tracking, automated fare calculation, and separate dashboards for riders, drivers, and admins.
 - **Point of Sale System** — Retail POS system with real-time inventory management, multi-payment billing, and sales reporting.
-

EDUCATION & CERTIFICATIONS**BS Computer Science**

Virtual University

PHP Developer Certification

Corvit Software House

Internships

Realstors (PHP Backend), Corvit (Frontend/UI focus)

TECHNICAL SKILLS

- **Backend:** Laravel, PHP, Rust, REST APIs, Microservices
- **Frontend:** Vue.js, Inertia.js, Blade
- **Databases:** MySQL, PostgreSQL, Redis
- **Infrastructure:** Docker, Kafka, Background Jobs
- **Payments:** Stripe, PayPal
- **Other:** Multi-tenant Architecture, Performance Optimization, System Design
